The ofder of Adja and General Puller

The ofder of Adjt ant General Fuller will command universal attention, both as regards the flattering inducements for recruiting developed in the correspondence with the Provots Marshal General at Washington, and the significant hint that Illinois will not apply for a temporary postponement of the draft. Cithesa now will receive the same premium as recruiting officers—fifteen dollars for each new recruit, and twenty-fire dollars for each retreat who shall be accepted by the District Provost Marshal. This is a generous offer. Let every man take hold in earnest during the few remaining days, and determine that Illinois shall maintain her old reputation of always filling her quotas.

The Columbus War Eagle of Saturday has the following items of interest: About one pear ago, Gen. Forrest, the notorious robel leader, made a raid upon towns attracted on the Mississippi & Ohio Railroad and took several small posts, together with a number of prisoners. There was great excitement in and about Columbus then, and it was deemed expedient by Gen. Davies to epike the guns at Island No. 10, and order Col. Scott, commanding the troops at New Madrid, to evacuate that post, blow up the magazines, and destroy the gun carriages, &c. The force at Union City was withdrawn and the garrison then acted entirely on the defensive. Perhaps it is not impolitic to state that we are, to-day confronted by the same Forrest, with quite a flarge force, including the consmands of Roddy, Faulkner, Newcomb, Richardson, and others. These men have designs of destroying the Mississippi & Ohio Railroad, and, doubtless, intend to capture Union City or Fadacab, probably both. The difference between our condition then and now is that instead of finding it necessary to spike guns, or act on the defensive, we have a force here equal to clearing the entire frontier country of guardilas, and a General who is not afraid to lead it.

A detachment of the 19th Pennsylvania regiment, about 100 in number, sent out on a scouting expedition the other day, from Union City, have not since reported at lead quarters. It is supposed they have got lost in the woods, or been taken prisoness by guerillas. Exertions are being made to find them.

Cohman would, strike it from the list for general cultivation. Hunter would not strike it off. It is too valuable. Motion to strike it off the list was lost.

DIANA.

It was moved to add this grape to the list for general cultivation. Dr. Humber, of Aiton, considered it worthless. Sherman says it does well at Rockford. Dr. Edwards says it is a good grape-wine hardy. The vine needs age to mature it perfectly. Colman says it does not ripen well. Dr. Androws says it does well. It keeps the best of all our grapes. Toung vines do not ripen the fruit so well as they do on old vines. Why. England Penned the Banus.

[Cor. of N. Y. Tribune.]

The detection of the rebel sums by the
English Government has been attributed to
various causes, all of which probably had
some effect a securing the final result. But
the steeps which, in all litestihood, decided the
action of the suthorities, and Insured a policy favorable to the North, has not, so far as I
am aware, been made public.

The fresh of the statement which follows
easy be implicitly relied on. If was made to
me by a distinguished American citizen, who
has just returned from England, where he
enjoyed presults facilities for becoming acquainted with the less public suffers of the
liwo countries stud who had the facts of the
case from headquarters.

THEP DAY.

EYENING SASSION.

Ö. W. Hoff, of Augusta, Hancock county, delivered an essay on fruits and their association.

The apple called the New York Pippin, in the flats of fruits, being known in Downing. Fruits as the Ben Davis, it was voted to change the name in accordance with Downing. The time and places thoilding the next Yalf of the Society was referred to the Executive Board, with power to act.

The same disposition was made of the time and place of noting the annual meeting.

Pr. Sheoder has planted that fruit in his vineyard, but has found it a bad practice. He would recommend Early Scaries, Longworth's Prolific, and Wilson's on high land; on low lands, Trionaphe de Gand, Jenny Lind, Extra Red. The land must be plowed deeply log sured against drouth, and to furnish plenty of food for the plants. Thinks we can grow three times as many bushels of strawberries as corn.

Colman, cultivate for market,—plow deep with trench plow. Willicom's is more productive than Longworth's Frolific. The Willson is the best for messate, as it corries to well, as the bose for messate, as it corries to well, as the bose for messate, as it corries to well, as the bose for messate, as it corries to well, as the bose for messate, as a servillare. Trionaphe de Gend is not a spood shipping truit—teo off. Dow't plant on messadow hand just turned over, as the while grab may destroy you plants. Plant early in spring, and renew plantations often; ship in drawers, holding one bushel each.

Booth plants Longworth's Prolific, Me-Avoy's Saperiom and the lown as a fertilizer. Maich with leaves and shavings. Would recommend Mr. Colman to feed his grobs on manure. He finds that McAvoy's Saperiom, to ship in good order, although his is a soft borry, yet is always arrives at Cnicago in good order. ized citizens should follow their base example, and slink away from the defence of the flag in this hour of national peril. They want our citizens to fight for themselves and for the skutkers to t.

In view of this disgraceful conduct, we submit to the candid judgment of those who stand by the old flag, in storm as well as smobine, whether the men who now turn their lacks on the country of their naioption, and take out foreign protection papers, a suid be allowed to become citizens their the ratio over and peace restored? to Rejected Spring at \$1.00, Whyrwas Whar'r in servers—\$2.000 to \$0.0, The six \$4 \text{Min}\$, which helpesed \$C.
